SUBJECT	Newly Discovered Uranium Ore Deposits	DATE DISTR.	3 November 1955
DATE OF INFO.		NO. OF PAGES	3
PLACE ACQUIRED		REQUIREMENT NO.	RD
DATE ACQUIRED		REFERENCES	This is UNEVALUATED Information

SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

Preparations recently began for the mining of uranium in the following newly discovered ore deposits:

1. In Orlicke Hory on the Bohemian-Moravian border, i.e. in the northeast part of Suchy Vrch, in the vicinity of Cerna Hora (trig. point 994), mining equipment is being installed. Houses for workers also are under construction. The hill Cerna Hora is out of bounds to tourists, and the lane running from the main Jablonne nad Orlici (N 50-02, E 16-36) - Cervena Voda (N 50-02, E 16-45) road to the former Kramar Hut is now blocked.
2. Other uranium deposits were discovered in southern Bohemia in the woods about three kilometers northeast of the town of Pisek (N 49-18, E 14-09). One of these deposits is in the vicinity of Zadusni Les, where preparations for mining have already begun, and the other one is in the vicinity of the area known as "V Zivci", where no preparations have been made so far,
